

FACILITATOR TRAINING

FAMILY & SYSTEMIC CONSTELLATIONS

An Experiential Trauma-Sensitive Approach
4 FIVE-DAY SESSIONS IN 2018

This 20 day training is for those participants wanting to learn about facilitating constellations in either a group or one-on-one process, constellation facilitators who want to deepen their facilitation skills and personal growth, and for those who want to pursue their own personal growth.

There are many similarities between working with an individual and with a group. The initial focus will be on the participant's own embodied processes and on understanding and experiencing the role of presence and co-regulation on the human nervous system in the creation of safety, first in one-on-one situations and then in group processes, and in resolving trauma in the individual and in the family system. The training will incrementally broaden perceptual and relational skills from working with an individual to working with groups. It is by experiencing and understanding our own embodied processes and nervous system adaptations that we are able to recognize and relate to those processes in the people who come for our help. It is in the context of safety, that trauma, whether personal or generational, is most effectively healed.

The training will include an experiential understanding of the foundational principles of Bert Hellinger's Orders of Love, Orders of Helping and Levels of Conscience, family and relational dynamics, attachment or bonding ruptures, self-, auto-, and co-regulation, and intergenerational grief and trauma resolution in order to support greater love, belonging, flow, resilience, and growth in life.
